

PLANT A TREE

This is what we, the members of the student school council, called the challenge, and we addressed it to all elementary schools in our city. International Tree Day, which is celebrated on October 20, became an inspiration for us to express that our Earth is important to us and that we can stand together for a good cause.

We want to thank the management of our school for the maximum support in the implementation of this project and at the same time all the participants. We managed to plant a tree for each school, which left us with a pleasant feeling and the joy of meeting together. We hope that these celebrations will become a tradition for us in the years to come.
